

customer		
PK	customer_id	SERIAL
	first_name	VARCHAR(100)
	last_name	VARCHAR(100)
	billing_info	VARCHAR(150)

I decided to have a final order ticket that would display the customer_id, the order total, the ticket_id, and the concession charge id. The ticket table links to a movie id in the movie table as well.

order		
PK	order_id	SERIAL
	order_total	NUMERIC(5,2)
FK	customer_id	Integer
FK	ticket_id	Integer
FK	concession_id	Integer

concession		
PK	concession_id	SERIAL
	concession_total	NUMERIC(4,2)

ticket		
PK	ticket_id	SERIAL
	ticket_total	NUMERIC(4,2)
FK	movie_id	Integer

movie		
PK	movie_id	SERIAL
	movie_name	VARCHAR(100)
	movie_duration	SERIAL
